# Product Catalog

We would like to thank you for choosing Cedar Siding Incorporated for your factory finish and building material needs.

Factory finishing is a solution and factory finished products carry a value proposition that simply cannot be ignored. They cost less and last longer than the exact same products coated on the jobsite! We appreciate your continuing efforts to educate contractors and homeowners about the benefits of factory applied coatings.

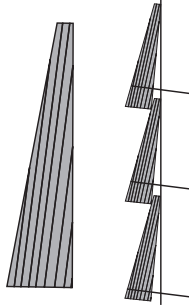

Our factory finish machine coat technology is a time tested system that has proven results. It is also a process that continues to evolve and improve each year. Cedar Siding, Inc. has played a key role in the development of new and better coatings, coating processes, and packaging solutions for more than 20 years. The result... together we are providing your customers with the best factory finished products available.

We encourage you to come tour our facility and see for yourself why Cedar Siding produces the highest quality factory finished products available today.

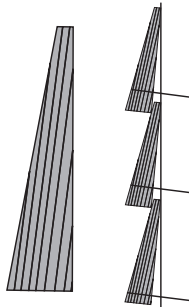

www.cedarsidinginc.com

**Clear Bevel** may be used with smooth or rough face exposure for textured effect. Horizontal applications only.

**Bevel Siding** may be used for horizontal applications only.

**STOP** Beveled Siding is only sold in random length tallies

## Bevel Siding

### Kiln Dried Clear Bevel

Clear Aye grade Western Red Cedar comes in lengths 3' through 20' with 55% (or more) of the tally being 3' – 10' and 45% of the tally being 11' – 20'. Clear bevels are graded to both the rough and smooth face and are reversible.

1/2 x 4 KD Clear Aye Grade

1/2 x 6 KD Clear Aye Grade

### Kiln Dried Select Tight Knot Bevel

Select tight knot bevels are Western or Inland Red Cedar and come in lengths 6' through 20' with at least 70% of the tally being 12' or longer. Tight knot bevels are graded to the rough face and have a hit or miss back.

11/16 x 6 KD Bevel

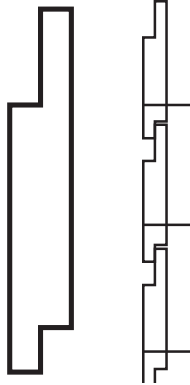

11/16 x 8 KD Bevel

3/4 x 10 KD Bevel

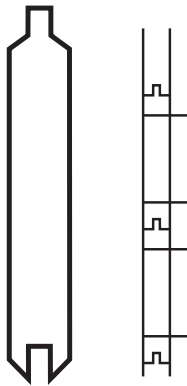

www.cedarsidinginc.com

Channel Rustic has 1/2" overlap (including 1/8" expansion gap) and can be used for horizontal or vertical applications.

Tongue & Groove lends itself to different aesthetic effects. It can be used for horizontal or vertical applications and may be used with a smooth or rough face exposure.

# Channel and Tongue & Groove

## Kiln Dried Channel

Kiln dried channel is select tight knot Western or Inland Red Cedar and comes in lengths 8' through 16'. Channel is available in random length, with 70% of the tally being 12' and longer, or specified length. Specify up to 14' with no additional charge. Specify 16' and longer for an additional 10% charge.

1 x 10 KD Channel

## Kiln Dried Tongue and Groove

Kiln dried tongue and groove is select tight knot Western or Inland Red Cedar that is reversible and comes in lengths 6' through 20'. Tongue and groove is available in random length, with 70% being 12' and longer, or specified length. Specify up to 14' with no additional charge. Specify 16' and longer for an additional 10% charge.

1 x 6 KD Tongue and Groove

# SHAKERTOWN

CEDAR SHINGLES SIMPLIFIED

Fancy Cut

Even Butt

Staggered Butt

Shakertown Cedar Shingle products are premium grade, clear vertical grain Western Red Cedar and are available in a variety of patterns and styles. Shakertown panel products dramatically reduce installation time when compared to individual shingle applications while the Fancy Cuts individual shakes feature different shapes that can be combined for endless design possibilities.

Shakertown Craftsman Panels are even better than the traditional Colonial panels because they feature a **blind nail** application and a **self aligning groove** for easier installation. The Craftsman panels have a thicker butt end providing a stronger product with an excellent visual appeal.

### 1 Course Panels

- Craftsman Even Butt 7" Exposure
- Craftsman Staggered Butt 7" Exposure

- 5/4 x 12 x 12 Reversible Trim

MaxiTile Fiber Cement Products are engineered to outperform the competition. Maxi has an extremely high quality primer that is applied to all 6 sides of the product including the back side. This ensures the product is better protected from the elements than any other fiber cement option. MaxiTile is manufactured and cured to the lowest moisture content of any fiber cement product which reduces moisture related issues such as efflorescence and shrinkage. Unlike other fiber cement products, either edge of the lap siding can be exposed to the weather, creating less waste and more usable product. Maxi has a distinctive and attractive wood grain your customers are sure to like. Additional benefits include clean straight edges that reduce the likelihood of edge chipping and damage and an industry leading 50 year warranty that covers manufacturing defects and specifically covers cracking, delamination and rot.

# LP SmartSide<sup>®</sup>

Siding & Exterior Trim

## SmartSide Composite Trim

SmartSide trim products are engineered to perform against harsh weather. They resist checking, shrinking, buckling, twisting, delaminating and splitting at the ends. And they are all treated with the patented SmartGuard process to resist structural damage caused by termites and fungal decay. The proprietary edge coating provides enhanced moisture resistance, and you can count on LP's special binders to add stability and strength. The 50-year product warranty fully covers materials **and labor** for the first 5 years. LP's warranty includes **complete replacement costs** including factory finishing for the **strongest product warranty of any trim product we represent.**

## MaxiTile Fiber Cement Trim Products

are manufactured by Plycem, MaxiTile's sister company. MaxiTRIM products carry a 25 year warranty, the best warranty in the fiber cement trim category. Unlike most fiber cement trim products, MaxiTRIM has the workability of common wood products because it cuts easily, can be routed and is not susceptible to cracking or breaking. Just like the MaxiTile siding products, MaxiTRIM is primed on all 6 sides for complete protection and excellent paint adhesion.

### Window & Door Surround

Standard Stealth

Stealth with Flange Slot

Trim with Flange Slot

Versatex Trim Boards are the next generation in exterior trim products. Made from closed cell extruded polyethylene, these products are completely impervious to water meaning they cannot absorb even the smallest amount of water. Versatex has the best test data on resistance to yellowing compared to the other well known brands in this category. They were also the first to create the stealth system for trim which allows pieces of fiber cement, SmartSide or even vinyl to slide behind the face of the trim product for an excellent finished look. Versatex comes with a 30 year **transferable** warranty, making Versatex a virtually maintenance free product. This product is available prefinished with up to a 25 year coating warranty in colors with LRV>55.

- One-Coat Solid: 15-Year Coating Warranty
- Two-Coat Solid: 25-Year Coating Warranty

### Factory Priming

- One Coat Oil Prime
- One Coat Latex Prime

### PLEASE NOTE

- Some colors may require two or more coats of finish for complete coverage!
- Smooth products will require a field applied finish coat!
- Materials must be kept dry at all times prior to installation, use a tarp or place materials in garage.
- Installation of materials denotes acceptance.
- We are not responsible for the occurrence of efflorescence or tannic acid bleeding.
- Trim requires 2 coats for complete coverage.
